

HEDAMO PRODUCT HEDAMO DIAGNOSTIC REPORT

Objective

Improve first-time comprehension,
increase transparency,
and create a clearer producer experience while preserving
HEDAMO's philosophy.

Problems Observed

Homepage purpose is unclear

Producer workflow lacks visibility

CTA language is ambiguous

Examples appear too late

Backlog priorities are not obvious

Design Principles

Clarity over complexity

Transparency over abstraction

Progressive disclosure

Evidence-first communication

Minimal interaction with premium feel

Solution Summary

Problem	Solution
Hero unclear	Simplified hierarchy
Weak CTA	Clear actions
Long reading	Better information hierarchy
Workflow	Visual progress tracker
Product backlog	Priority matrix

Expected Outcomes

- Faster understanding
- Higher producer confidence
- Better navigation
- Improved transparency
- Reduced cognitive load

Reflection

The redesign focused on improving clarity, usability, and transparency while staying true to HEDAMO's mission. I simplified the homepage, clarified the value proposition, introduced clearer calls to action, and designed a transparent producer application status flow. The product backlog was prioritised using an Impact vs. Effort framework to focus on the most valuable improvements. Overall, the redesign helps users understand HEDAMO faster and navigate the platform with greater confidence.
