Product Backlog	Product issues were not prioritised.	Created a prioritised backlog using an	Provides a structured roadmap

Key Design Decisions

- Simplified the homepage for faster first-time understanding.
- Improved the visual hierarchy using consistent spacing and typography.
- Added clear actions for both producers and reviewers.
- Designed a transparent application status flow.
- Prioritised product improvements using an Impact vs. Effort framework.
- Preserved HEDAMO's minimal visual identity and philosophy while improving usability.

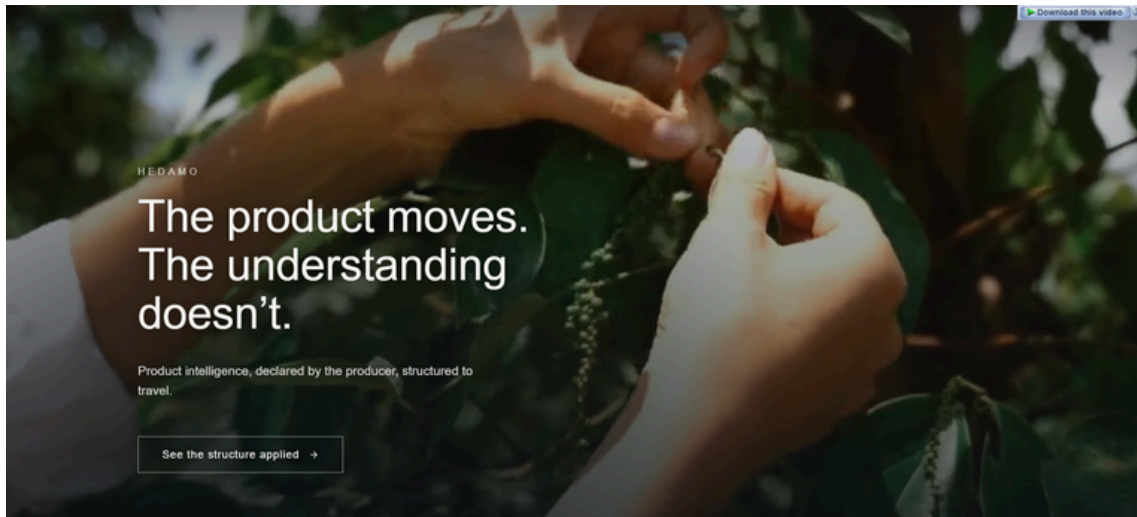

Expected Outcomes

- Reduce time needed to understand HEDAMO.
- Increase CTA engagement.
- Improve producer completion rate.
- Reduce homepage bounce.
- Increase successful declarations.

Success Metrics

- Homepage understanding time
- CTA click-through rate
- Producer application completion
- User satisfaction
- Task success rate
